

Silk

signia

Life sounds brilliant.

REPLICATING NATURE.

The new Silk hearing aids from Signia.
The smallest and most natural-sounding
ready-to-wear hearing aid.

signia-hearing.com/silknx

Practically invisible
for a natural look.

The new Silk.

Whether you're spending time with the special people in your life or meeting a new special someone, Signia's latest Silk™ hearing aids give you the confidence of knowing that no-one even notices you're wearing them. One of the world's smallest hearing aids, Silk is ready to wear on the spot thanks to its super soft silicone sleeves that allow it to hide comfortably in your ear. Looking good and hearing well has never been so quick and simple.

The ultimate in discretion

Signia's new Silk is 20% smaller than its predecessor, making it practically invisible in the ear.

Click, fit and go

Available in different sizes, the silicone sleeves simply click onto Silk hearing aids and sit securely in the ear for a completely natural, perfect fit on the spot without having to wait for a custom-made housing as with other in-the-ear hearing aids.

Clear color coding

The color coding of red for right and blue for left helps you to put the hearing aids in the correct ear easily.

Natural hearing at its best.

Crystal clear sound with a natural flow.

Whether it's a crowded street, an open-plan office, or a busy restaurant, wherever there's a high level of ambient noise, holding a conversation requires concentration and effort.

Silk tackles these challenges expertly, replicating the natural way we localize sound. It focuses on what's important, such as your conversation partner, while filtering unwanted background noise. You hear most clearly what you want to hear. All day long. In every situation.

Please note:
Features may vary depending on the configuration of the individual hearing aid. Your hearing care professional will be happy to assist you.

Crystal clear sound

Silk's **Sound Clarity** offers the most natural, lifelike sound in all environments. This lets you enjoy crystal clear sound, even in the loudest environments.

Speech in noise

Thanks to its **Speech Quality**, Signia's Silk enables you to hear speech clearly in all situations through sophisticated microphones and advanced noise suppression technologies. This makes it easier for you to understand your conversation partner, even in very noisy environments such as a restaurant or a conference.

Phone calls

Activated by miniPocket or the touchControl App, Silk's **TwinPhone** feature transmits the caller's voice into both your ears so you can understand every word better.

Full control in your hands.

touchControl App

miniPocket

Perfectly positioned for phone calls and music.

Unlike hearing aids that sit behind the ear, Silk's microphones pick up sound from inside the ear canal.

This enables you to make phone calls and listen to music in the way you are used to naturally. You can even use over-ear headphones. Wearing Silk is so natural you will forget you are wearing hearing aids.

Remote control

The **touchControl App™** lets you change Silk's settings remotely and personalize your hearing aids to suit your individual preferences.

And if you don't have a smartphone, the **miniPocket™** also provides highly convenient remote control.
